

Air1 radio station serves our community with totally positive music and encouraging words, including those of helping marriages to succeed, and encourage our kids to stay straight! Only a few stations as Air1 does this kind of positive input.

Once LPFM is implemented I may lose the option of hearing the Air1 Radio station, making it a secondary station.

Recommend if you implement an LPFM bandwidth that stations of smaller listening communities, or those that are waiting for bandwidth to start running to use the LPFM, not those currently running.

Impact to our communities would be great because this is one of the very few radio stations that give positive input into making our lives successful.

Please keep Air1 on the strongest bandwidth frequencies as possible!

Thank you,

Denis Campbell
